SENDGRID ACCOUNT CREATION:

The screenshot displays the Twilio SendGrid dashboard with a sidebar on the left containing navigation links: Dashboard, Email API, Marketing, Design Library, Stats, Activity, Suppressions, Settings, and Twilio SMS. The main content area features a blue header with the text 'Send your first emails with Twilio SendGrid' and an illustration of two people running. Below the header, a section titled 'Create a sender identity' provides instructions on how to set up a sender identity, mentioning 'two ways' to do so. A blue button labeled 'Create a Single Sender' is visible, along with a link to 'Authenticate a domain Instead'. To the right, a diagram illustrates the sender identity as the 'from' email address, showing an example: 'Your Business <jane.doe@your_business.com>'. At the bottom, a grey bar with the text 'Send your first email' and a lock icon indicates that a sender identity must be created before sending the first email.

To get up and running quickly, please follow the steps outlined below.

Send your first emails with Twilio SendGrid

Create a sender identity

Before sending email, you'll need to create a sender identity. There are [two ways](#) to do this, but we recommend creating a Single Sender to get set up quickly and test your email integration.

[Create a Single Sender](#) [Authenticate a domain Instead](#)

Your sender identity is the "from" email address your recipients will see in their inbox. [Learn more](#) about this.

Your Business <jane.doe@your_business.com>
